A FREE FIELD GUIDE FROM KURV · BOOK 14

More than Images

BOOK

14

MEDIA

FILES
- Cover required
- One type
- You still sign

Songs, short videos, GLB models, and code art. The cover, the file, the sealed frame, and the press that plays them.

16 MIN The media field guide. On testnet, where coins are free and nothing has value.

Apply at kurv.fun/apply

KURV runs on testnet, on Base Sepolia and Solana Devnet. Testnet pieces and coins have no value.

CHAPTER 01 · THE TYPE

Pick one type

THE TYPE

Launch has six types. This book is the four that are not a stack of layers: songs, short videos, 3D models, and code art. Each piece still needs a cover. KURV runs on testnet. Coins are free and nothing has value.

A collection is one type. Do not mix songs and films. Do not mix a model with a video. Layers stay images and GIFs. Studio does not build these four.

CHAPTER 02 · THE COVER

The cover and the file

THE COVER

Covers live in art/, numbered from 1, one format, up to 20 MB. The extra file uses the same number in media/. Code art is one page in code/ for the whole collection. KURV reads the first bytes of a file, so a renamed file is refused.

KURV writes animation_url when it publishes. A link you supply is kept only when it is ipfs://. Any other server is refused. On Solana the category is audio, video, vr, or html.

CHAPTER 03 · AUDIO

Launch an album

AUDIO

Pick Audio NFTs. Sound files are MP3, WAV, FLAC, OGG, or M4A, up to 50 MB. AAC on its own, AIFF, and MIDI are not taken. Nothing plays until someone presses Play. Only one piece plays at a time.

Some music plans do not allow resale. Check the plan, then confirm you may sell the files when you press Publish. KURV cannot confirm that for you.

CHAPTER 04 · VIDEO

Launch a short video

VIDEO

Pick Short videos. Files are MP4 or WebM, up to 200 MB. MOV, AVI, and MKV are not taken. The cap is the size. A duration label, if you store one, is at most one day.

Nothing autoplays. A wallet may show only the cover, so the picture has to carry the film on its own. A sealed sale can hide the film until the reveal.

CHAPTER 05 · 3D

One GLB

3D

Pick 3D models. One binary glTF, a .glb, up to 50 MB, in media/. A .gltf with loose textures is refused, and so are USDZ, FBX, and OBJ. Export one file from the tool you already use. KURV has no 3D editor.

The model opens only after View in 3D, in a sealed frame on a separate address: no wallet, no internet, no popups. A sealed sale cannot carry a model.

CHAPTER 06 · CODE

One page of code

CODE

Pick Code art. One page for the collection, up to 5 MB: index.html with every script inside, or sketch.js with p5.min.js and other local .js files. The page reads kurv.id, kurv.hash, and kurv.random(). Math.random() uses the same seed.

No internet, no eval, no WebAssembly, no outside address. The page opens only after Run, in the same sealed frame. A sealed sale cannot carry code art. Make each cover from the same hash as the piece.

CHAPTER 07 · PLAY

How a collector opens it

PLAY

The cover is what a collector sees first. The file waits for a press, on the collection page at testnet.kurv.fun. A wallet or another marketplace may show only the picture, so the cover has to stand on its own.

01 **Play**
A song or a film. One at a time. No autoplay.

02 **View in 3D**
A model, off KURV's own site.

03 **Run**
Code art, in the same sealed frame.

04 **The cover**
A wallet may show only this.

CHAPTER 08 · THE AGENT

Upload with your agent

THE AGENT

The agent sends files with kurv_media_upload_link, or kurv_import_media_url for a public https link. Do not send a song or a film as base64. A model is media/1.glb. Code is code/index.html. Files stay private until you press Publish.

You still read the draft, confirm the rights, and sign. The agent never holds the key. Opening the review link does not publish and does not sign.

CHAPTER 09 · THE LIST

Before you publish

THE LIST

01 **One type.**
Songs, or films, or models, or code. Not a mix.

02 **Covers.**
Numbered, one format, 20 MB, required.

03 **The bytes.**
A real MP3, MP4, WebM, or GLB. A rename is refused.

04 **The seal.**
Songs and videos can hide until reveal. 3D and code cannot.

05 **The signature.**
Yours. Fees match every other collection.

THE LAST PAGE

The file is ready

KURV runs on testnet, on Base Sepolia and Solana Devnet. Testnet pieces and coins have no value. Bring the cover and the file, then sign once.
